

Science Spin K-1 Has Its Own Access Code.

This code unlocks your subscription at **sciencespink1.scholastic.com**.
It is **DIFFERENT** from the code for *Let's Find Out* or *Scholastic News*.

Start exploring the videos, STEM activities, and skill sheets you get with *Science Spin K-1*:

1. Go to **sciencespink1.scholastic.com**.
2. Enter your access code when prompted.

That's it! Now you're set for the whole school year. ***Psst: Flip over this page. See what you'll find online for September!***

Warmly,
Erin Kelly, Editor

- Mark Rober was a scientist at NASA before he took on backyard squirrels. He helped build the Mars rover Curiosity, a robot that is exploring the surface of Mars.
- He named the four squirrels that tackled his obstacle course: Rick, Marty, Frank, and Gus. Rick finished the course first.
- This September, Scholastic and Mark's CrunchLabs company will begin publishing a series of STEM books with *Lava vs. Laser* and *Extreme Engineering*.

Coming Next Month!
