Draw weather icons to match the words.

raining

sunny

snowing

cloudy

windy

foggy

The Weather

Concept: Scientists can predict what the weather will be like by looking at clouds.

What You Need:

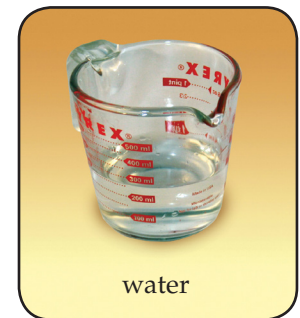

- a container with a metal lid, like a jar
- some ice cubes
- some very warm water

What You Do:

- Fill a quarter of the container with warm water.
- Place the lid upside down on the container.
- Put the ice cubes on top of the lid.

What You Should Notice:

A cloud forms in the container.

Explanation:

Explain why a cloud forms in the container.
